

PRODUCTIVITY AND DEVELOPMENT CENTER

MODERNIZING GOVERNMENT REGULATIONS PROGRAM OFFICE (MGRPO)

2020 Projects

| # | PROJECT TITLE | Brief Description/Concept |
|---|---|---|
| 1 | Training Course on Smart Regulation | <p>The training course intends to:</p> <p>a. To introduce basic tools for evaluating the requirements and principles for developing, implementing, and evaluating a smart regulation; and b. To acquaint participants with the concepts of innovation, government digital services, and e-government systems to increase effectiveness and efficiency in meeting public needs and promote the quality of regulatory governance.</p> |
| 2 | P1 - Program and Regulatory Management and Information System Component | <p>The Regulatory Management Information System Component aims to contribute to regulatory reform initiatives through the expansion of the Business Regulatory Information System and perform overall monitoring of the program progress and accomplishments.</p> |
| 3 | P2 - Industry Regulatory Review | <p>The Industry Regulatory Review Component aims to examine the existing regulatory environments affecting the identified priority industries, to determine how they affect the growth and operations of businesses and identify recommendations that would make those regulations more relevant and coherent.</p> |
| 4 | P3 - Capacity Building Component | <p>The Capacity Building Component aims to create a pool of resource persons on Regulatory Impact Analysis (RIA) with the capacity to conduct risk-based approaches in evaluating regulations, develop training guides and materials on the conduct of RIA, and validate inputs on the development of the Regulatory Management System (RMS) standards.</p> |
| 5 | P4 - Advocacy and Public Consultation | <p>The Advocacy and Public Consultation Component aims to present key issues and recommendations of the MGR study teams to relevant interested parties, solicit key issues and recommendations, and raise awareness of the key stakeholders on good regulatory practices.</p> |
